			MAIL DATE	DELIVERY MODE
			08/18/2008	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/674,911	Applicant(s) WATTERSON ET AL.
	Examiner /Glenn Richman/	Art Unit 3764

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED. (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 18 July 2008.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 10-26,28-34 and 58-70 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 10-26,28-34 and 58-70 is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) Notice of References Cited (PTO-892)
 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
 3) Information Disclosure Statement(s) (PTO/SB/08)
 Paper No(s)/Mail Date 5/2/08/5/27/08/7/18/08
- 4) Interview Summary (PTO-413)
 Paper No(s)/Mail Date. _____
- 5) Notice of Informal Patent Application
 6) Other: _____

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10-14, 16-26, 28-34, 58-68, 70 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shea (6050924) in view of Rawls.

Shea discloses a receptacle that supports at least one storage medium containing an exercise program to be delivered to the plurality of exercise devices (col. 6, lines 61 – et seq.), said exercise programming comprising (col. 6, lines 61 – et seq.), motivational content (col. 6, lines 61 – et seq.), and (ii) control signals synchronized with said motivational content (col. 6, lines 61 – et seq.); and a wireless transmitter communicably connected with said at least one storage medium and receiving said exercise programming, said transmitter delivering said exercise program to the plurality of exercise devices (col. 5, lines 1-14).

Shea does not disclose said transmitter delivering said exercise program simultaneously to each of the plurality of exercise devices, wherein the simultaneous delivery of said exercise program to each of the plurality of exercise devices is the initial communication between the central control unit and each of the plurality of exercise devices, wherein the initial communication is initiated by a user at the central control unit.

Rawl discloses disclose a transmitter delivering exercise program simultaneously to each of the plurality of exercise devices, wherein the simultaneous delivery of said exercise program to each of the plurality of exercise devices is the initial communication between the central control unit and each of the plurality of exercise devices, wherein the initial communication is initiated by a user at the central control unit (col. 10, lines 14 – et seq.).

It would have been obvious to use Rawl's delivery of said exercise programs simultaneously with Shea's device, as it is well known as taught by Rawl's to delivery exercise programs to different exercise devices simultaneously for providing a competition.

As for claims 11-14, 16-18, Shea further discloses said control signals are delivered to the plurality of exercise devices using at least one of an infrared signal and a radio signal (col. 5, lines 1-14), a base, a stand extending from said base, and a control panel mounted to said stand (fig. 4), said receptacle further comprises an input receptacle that receives said at least one storage medium (col. 6, lines 61 – et seq.), said at least one storage medium comprises one or more of a magnetic storage medium, an optical storage medium, and a flash memory medium (col. 6, lines 23 – et seq.), at least one input port, said input port receiving said exercise programming from a broadcast transmission device (col. 5, lines 1-14), at least one input port, said at least one input port receiving said exercise programming from a computerized output device (col. 5, lines 1-14).

As for claims 19-26, 28-34, Shea further discloses a control panel fig. 4, 8B mounted to said support structure, said control panel comprising: an input receptacle that receives at least one storage medium containing a plurality of exercise programs to be delivered to each of the one or more said plurality of exercise devices (col. 6, lines 61 – et seq.), each of said plurality of exercise programs comprising (i) motivational content (col. 7, lines 8-12), and (ii) control signals synchronized with said motivational content; and a wireless transmitter communicably connected with said input receptacle and receiving said exercise programs from said at least one storage medium (col. 6, lines 61 – et seq.), said transmitter delivering said exercise programs to each of the one or more said plurality of exercise devices using a wireless carrier signal (col. 5, lines 1 – et seq.).

Rawls further discloses said control panel is adapted to enable an exerciser to select one of said plurality of exercise programs at said control panel and activate said control panel such that said wireless transmitter delivers said one of said plurality of exercise programs to said plurality of exercise devices without prior communication between the exerciser and said plurality of exercise devices or from said plurality of exercise devices to said central control unit (col. 10, lines 14 – et seq), and wherein said central control unit is adapted to control said plurality of exercise devices in succession without further input from the exerciser at said central control unit or said plurality of exercise devices (col. 10, lines 14 – et seq).

Shea further discloses said at least one input device comprises at least one control that changes at least one operating parameter of the central control unit (col. 5,

lines 1 – et seq.), said at least one output device comprises at least one visual display that depicts a visual representation of said exercise programming (col. 3, lines 40 - et seq.), at least one output device comprises at least one audio device that broadcasts an audio portion of said exercise programming (col. 15, line 15), said wireless carrier signal is a signal selected from the group consisting of an infrared signal or a radio signal (col. 5, lines 1-14).

As for claims 58-69, Shea further discloses a receptacle providing a user interface for the central managing unit (col. 6, lines 61 – et seq.), and a transmitter supported by the receptacle (col. 5, lines 1-14), the transmitter simultaneously delivering exercise programming to the one or more plurality of exercise devices, the exercise programming comprising control signals synchronized with motivational content for controlling an operation of the plurality of exercise devices and simultaneously providing encouragement and/or instruction to the exerciser (col. 7, lines 8-12),

Rawls further discloses the central managing unit is adapted to: enable an exerciser to select and activate exercise programming at the central managing unit, simultaneously deliver the exercise programming to the plurality of exercise devices without prior communication from the plurality of exercise devices to the central managing unit (col. 10, lines 14 – et seq.).

Shea further discloses control an operation of a first exercise device of the plurality of exercise devices upon selection and activation by the exerciser of exercise programming at the central managing unit (col 6, lines 61 – et seq) and, upon completion of the operation of the first exercise device, automatically control an

Art Unit: 3764

operation of a second exercise device of the plurality of exercise devices without any additional input from the exerciser at the central managing unit or the plurality of exercise devices (col. 10, lines 54-67), at least one storage medium (col. 5, lines 1-14), the at least one storage medium storing the exercise programming (col. 5, lines 1-14), an input receptacle that receives at least one storage medium (col. 6, lines 61 – et seq.), a receptacle providing a user interface for the central unit (col. 6, lines 61 – et seq.); and a transmitter supported by the receptacle, the transmitter delivering exercise programming to the one or more exercise devices, wherein the exercise programming includes motivational content and the delivery of the exercise programming is the initial communication between the central unit and the plurality of exercise devices (col. 6, lines 61 – et seq.), the exercise programming includes instructional content (col. 10, lines 27 – et seq.), a central unit for communicating with one or more exercise devices, the central unit comprising: a receptacle providing a user interface for the central unit (col. 2, lines 64 - et seq.); the transmitter is a transceiver for: delivering exercise programming; and receiving feedback signals regarding the performance of exercise at the respective one or more exercise devices (col. 10, lines 27 – et seq.), the exercise programming is delivered to the one or more exercise devices using hardwire connections between the central communications unit and the one or more exercise devices (col. 4, lines 64 - et seq.).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Shea and Rawls in view of Shum.

Shea does not disclose at least one storage medium stores one or more MP3 audio files.

Shum discloses using an MP3 audio file (col. 8, lines 38-45).

It would have been obvious to use Shum's MP3 with Shea, as it is a well known audio device, as taught by Shum, for use of a storage medium.

Claim 69 is rejected under 35 U.S.C. 103(a) as being unpatentable over Shea and Rawls in view of Powers.

Shea does not disclose at least one input port, the input port receiving the exercise programming from an Internet address.

Powers discloses disclose receiving the exercise programming from an Internet address (abstract, col. 4, lines 17-24).

It would have been obvious to use an Internet address, as it is old in the art as disclosed by Powers, with Shea's device, for providing another means of transmitting programming.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to /Glenn Richman/ whose telephone number is 571-272-4981. The examiner can normally be reached on Mon-Thurs.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, LoAn Thanh can be reached on (571)272-4966. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
